## KS4 Combined Science (Trilogy) Homework 6 - Osmosis Practical

Q1.
A student investigated the effect of different concentrations of sugar solution on pieces of potato.

This is the method used.

1. Cut five pieces of potato.
2. Record the starting mass of each piece of potato.
3. Place each piece of potato in a different concentration of sugar solution.
4. After 24 hours remove the pieces of potato from the solutions.
5. Record the final mass of each piece of potato.
6. Calculate the change in mass for each piece of potato.
(a) What is the independent variable?

Tick ( $\checkmark$ ) one box.

Change in mass of the pieces of potato

Concentration of the sugar solution

Length of time the pieces of potato are in the solution

Starting mass of the pieces of potato

The table below shows the results.

| Concentration of <br> sugar solution in <br> mol/dm | Mass of <br> potato at <br> start in <br> grams | Mass of <br> potato after <br> 24 hours in <br> grams | Change in <br> mass in <br> grams |
| :--- | :---: | :---: | :---: |
| 0.0 | 7.94 | 10.14 | 2.20 |
| 0.1 | 7.95 | 9.10 | 1.15 |
| 0.2 | 7.96 | 8.21 | 0.25 |
| 0.3 | 7.93 | 7.53 | -0.40 |
| 0.4 | 7.93 | 7.18 | -0.75 |
| 0.5 | 7.95 | 7.00 | -0.95 |

(b) Explain why the potato in $0.0 \mathrm{~mol} / \mathrm{dm}^{3}$ sugar solution increased in mass.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(c) Complete the graph below.

Some of the results have been plotted for you.
You should:

- plot the data from table above
- draw a line of best fit through all the points.

(d) The mass of a piece of potato does not change when:
concentration of solution inside cells $=$ concentration of solution outside cells
Determine the concentration of sugar solution inside the potato cells.
Use the graph above.
Concentration = $\qquad$ $\mathrm{mol} / \mathrm{dm}^{3}$

The table is repeated below.

| Concentration of <br> sugar solution in <br> mol/dm | Mass of <br> potato at <br> start in <br> grams | Mass of <br> potato after <br> 24 hours in <br> grams | Change in <br> mass in <br> grams |
| :--- | :---: | :---: | :---: |
| 0.0 | 7.94 | 10.14 | 2.20 |
| 0.1 | 7.95 | 9.10 | 1.15 |
| 0.2 | 7.96 | 8.21 | 0.25 |
| 0.3 | 7.93 | 7.53 | -0.40 |
| 0.4 | 7.93 | 7.18 | -0.75 |
| 0.5 | 7.95 | 7.00 | -0.95 |

(e) Calculate the percentage change in mass for the potato in $0.2 \mathrm{~mol} / \mathrm{dm}^{3}$ sugar solution.

Use table above.
Use the equation:

$$
\text { percentage change in mass }=\frac{\text { change in mass }}{\text { mass of potato at start }} \times 100
$$

Give your answer to 3 significant figures.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Percentage change in mass ( 3 significant figures ) $=$ $\qquad$ \%
